Take your business to the next level with Deskera All-in-One

Get started with Deskera

Take away the hassle of buying multiple software and integrating them by paying extra. Deskera boasts of being the only software for SMBs that gives a modular arrangement of accounting, inventory, eCommerce, payroll, CRM, and marketing features. It's an ERP built for the SMBs minus the hassle of prolonged implementation, high subscription costs and infra requirements. Here are some of its benefits:

All Your Crucial Business Functions in One Software

Deskera offers tools to manage your most critical business operations - billing, order fulfillment, payments, purchase, inventory tracking, eCommerce, payroll, sales, and marketing in its platform. You also get additional capabilities like custom reporting, document designing.

Use Deskera as You Grow

Deskera is built on the understanding that an SMB will not need all the tools when he starts but will need more tools as he grows. Deskera's modular structure allows you to start using any module of Deskera first. Within modules, you can also choose to use features as per your business workflow and switch off the others.

Generate Qualified Leads and Sell More

Deskera gives you tools to build unlimited contacts lists, landing pages, persona-focused funnels, segments, and email automations to build a marketing nurturing funnel. Track unlimited deals, pipelines and record activities for sales closure.

Powerful Accounting

Deskera gives you all the accounting tools you will need for your business - flexible invoice designing, bill scanning, automated recurring transactions, custom fields, payment processing with multiple vendors, GST/SST/Local tax compliance, fixed assets, financials and statutory reports.

Connection to Major Southeast Asia Banks

Deskera provides you with connections with the best range of banks through its multiple providers. The rule-based engine recognizes custom-defined rules and reconciles transactions automatically. Don't worry if you can't find your bank; it's still pretty easy to import your statement.

Advanced Inventory Tracking *

For SMB's that require managing products, Deskera provides extensive feature sets like reserve stock, reorder level, batch no/serial number tracking, barcode scanning, bill of materials, multiple warehouses, inventory adjustments/transfers, product variations, multiple unit of measures.

Efficient Order Delivery

Deskera can handle various order processing operations - standard order, dropshipping, backorder processing, pick, pack & ship with integration to shipping carriers. It allows you to print delivery orders, labels, and invoices at the same time.

It's E-commerce Enabled

Deskera allows you to connect to multiple Shopify, WooCommerce, Amazon FBA & FBM stores and streamline your online business in minutes. Inbuilt Shop Builder allows you to build and launch your own webstore with products, inventory and orders synced in real time.

Run Unlimited Payroll

Deskera gives you the flexibility to run payroll for employees without worrying about getting billed per employee. Generate all local compliance forms, e-submission files, and reports. Submit bank giro, file for leaves, and scan expense bills on the go.

It's Easy on Your Pocket

Deskera only charges you for power users, rest users/employees are all free to use*. It doesn't limit you on the no of transactions or contacts or emails - its unlimited.

Business Super App

Deskera subscription comes with access to first of its kind - fully featured mobile app capable of running most of the business operations from your phone..

Bookkeeper

Invite your bookkeeper for free to Deskera to confirm your accounts before submitting your statutory forms. Deskera comes with an exhaustive list of tools which helps bookkeepers to not only manage their clients but also their practitioners in a easy way.

★★★★★

one stop solution for accounting, CRM & HR needs for any business

I have been using Zoho books for more than 2 years now and was very scared to switch. I on a trial used deskera for almost a month and the learning curve have been awesome. I was so happy that I immediately purchased a code and also considering to upgrade it even. This tool has a huge potential and I am still enjoying that [SENSITIVE CONTENT HIDDEN] are active and ready to support. I purchased it for a manufacturing business and am really loving the option and features it has. I have full faith that this product will be my one-stop solution for accounting & HR needs (payroll for now). I wish that this product reach its full potential and we also grow with it.

Exceptional 'bang for bucks'!

Deskera does all and more than I need in accounting, HR and CRM software and yet is priced way below competitive alternatives. The product is already very well featured but their roadmap is full of additional functions and features that can only further improve an already strong product. Since subscribing, they have already added a number of enhancements, most interestingly for me, is their Shopify alternative. They have a FB user group where they continually interact with users in an extremely responsive manner. As an example, I asked a question and received a comprehensive response in less than 15 minutes! You can't beat that!

Finally, A One-App Rules All Solution For My Business!

Deskera All-In-One has been a wonderful investment I've made to ease my life. The time and cost-savings that Deskera will provide to SMEs and large companies alike would be tremendous. I highly recommend using Deskera!
